Company Profile – RoundIHMP

Company Name: RoundIHMP

Website: www.roundihmp.com

Industry: Financial Technology (FinTech) / Tax Compliance

Location: Bulawayo, Zimbabwe

About RoundIHMP

RoundIHMP is a pioneering Zimbabwean-built fintech platform that is transforming the way local businesses comply with tax regulations. Built from the ground up by local talent, RoundIHMP addresses one of the biggest barriers to compliance for small and medium-sized businesses in Zimbabwe: the **cost, complexity, and rigidity** of traditional fiscalisation systems.

At its core, RoundIHMP is more than just software — it is a **complete fiscalisation and business automation ecosystem** that helps businesses remain compliant with ZIMRA's fiscal device requirements without needing expensive hardware, complicated software.

The Problem We Solve

For years, fiscalisation in Zimbabwe has relied heavily on **manual integrations with traditional accounting packages** like Pastel or QuickBooks, requiring costly hardware fiscal devices, technical installation, and specialist support. These systems are:

- **Expensive to purchase and maintain**

- **Difficult to operate without training**

- **Often locked to one machine**

- **Not user-friendly for small business owners**

- **Inaccessible to businesses in rural or low-connectivity areas**

As a result, many SMEs have struggled to meet compliance requirements, putting them at risk of penalties, or forcing them into underreporting.

Our Solution

RoundIHMP was built to solve these problems **in a way that is uniquely suited to the Zimbabwean market.** It's a lightweight, modern, cloud-based platform that works across devices — phones, tablets, laptops — and includes the features that matter most:

✅ **ZIMRA-Compliant Fiscalisation Engine**

Built to meet the requirements of the ZIMRA Fiscal Device Gateway API (v7.2+), RoundIHMP submits fully certified invoices, receipts, credit notes, and debit notes — **with secure hashing, signatures, and previous hash validation** included.

✅ **Device-Free, No Installation Needed**

No physical fiscal devices required. All fiscalisation is handled securely through the cloud.

✅ **Point-of-Sale and Business Tools Included**

Integrated POS, sales tracking, payslip generator, quotation system, leave management, document creation, and customer records — **all in one place.**

✅ **Secure Local QR Code Generation**

No need to connect to third-party QR services. QR codes for ZIMRA receipts are generated and printed directly, improving speed and reliability.

Built for Zimbabwe — Scaled for Africa

RoundIHMP is **designed by Zimbabweans, for Zimbabwean businesses.** We understand the challenges SMEs face, from power outages to staff sharing devices to internet blackouts. Our platform was built with **real-world**

constraints in mind — and as a result, it works better for real Zimbabwean businesses than imported systems ever could.

With growing interest from SMEs across the country, RoundIHMP is on track to become **Zimbabwe's most widely adopted fiscalisation platform**, quietly powering compliant transactions in all provinces.

Who Uses RoundIHMP?

- Small retailers

- Local service providers

- Tuckshops and informal traders

- Professional firms

- Freelancers

- NGOs and community organizations

- Remote rural businesses

- Urban startups

Whether it's a one-person operation or a growing business with multiple employees, RoundIHMP can scale with the business.
